so so game,,FIFA is better. Useless scripted trash, in top star is too easy in legend you can't hold the ball for a second it does not matter if you have Messi, Zlatan a 60 rated player will throw you off, and bad teams will score no matter what, and play like Barcelona, is scripted trash, you can play the game 5 times the ia will score every game at minute 25 and at the end, if you are winning, do not buy it, online is unplayable, it never finds any opponents, it shouldn't even say that the game has online functions it just isn't true, do not waste your money please, learn from my mistake, i have loved pes since pes 5, but what Konami is doing, is just bad business, i will not buy another pes, ever, offline is bad online is a lie, worst pes ever, the script ruins the whole game.. not better than 2018 but that's all right. this game's cheap anyway. Offline is great, especially with mods. Master League triumphs FIFA in every way except presentation and commentary. Online on the other hand is literally unplayable most of the time (servers are down constantly), so if you're looking to play online buy FIFA. Realistic gameplay mods and classic squad packs make the game far better than FIFA, even the vanilla gameplay is so much better than FIFAs scripted 's'. The CPU is actually difficult in this game, making Master League worth playing over FIFAs manager career mode. Buy this if you're looking for a football sim, buy FIFA if you're looking to play Ultimate Team or other online modes.. best football games. Can't play offline! Everytime I put steam into offline mode, pes cannot be launched. Very disappointed with this situation
